## **ABSTRACT**

**OVAS** is a web-based application that provides an online appointment platform for Veterinary Clinic's clients. This project manages the appointment requests of pet owners online. This allows the clients to book an appointment to desired dates if there's a slot available. It has a pleasant user interface and is easy to use.

**Project Title: OVAS**

**Project Description Logo:**

# ONE PAGE BUSINESS CASE TEMPLATE

DATE	17-03-2022
SUBMITTED BY	VANSHAJ BARNWAL, ANUSHK SHUBHAM
TITLE / ROLE	OVAS

## THE PROJECT

In bullet points, describe the problem this project aims to solve or the opportunity it aims to develop.

- The system is going to reduce the implementation and maintenance costs and to make the system shareable with other veterinary hospitals or research centers without additional costs
- IHE (Integrating the Healthcare Enterprise) is designed to promote the integration of the information systems that support modern healthcare institutions.
- Its fundamental objective is to ensure that in the care of patients all required information for medical decisions is both correct and available to healthcare professionals.

## THE HISTORY

In bullet points, describe the current situation.

Pet ownership is increasing, in large part due to the number of millennial pet owners. More pet owners as well as the advent of extensive veterinary care options have resulted in a substantial increase in veterinary care spending. Yet, regardless of client cohort or type of medical procedure performed, communication between clients and veterinarians continues to be a key component in patient care and client satisfaction.

Pet owners also reported wishing to receive medical updates more frequently than they currently experience, with 53.8% of participants reporting they would pay extra for this service.

## **LIMITATIONS**

List what could prevent the success of the project, such as the need for expensive equipment, bad weather, lack of special training, etc.

The diagnostic capability of the veterinarians of the diagnostic sections and the veterinarians of the clinical sections;

The opportunity to carry out correct and efficient epidemiological research or general clinical research activities for the other hospital veterinarians.

## **APPROACH**

List what is needed to complete the project.

The RAD (Rapid Application Development) model is based on prototyping and iterative development with no specific planning involved. The process of writing the software itself involves the planning required for developing the product.

Rapid Application Development focuses on gathering customer requirements through workshops or focus groups, early testing of the prototypes by the customer using iterative concepts, reuse of the existing prototypes (components), continuous integration and rapid delivery.

## **BENEFITS**

In bullet points, list the benefits that this project will bring to the organization.

A veterinary management system is an effective tool for improving the level of a pet's healthcare, delivering better customer service and streamlining most of the associated tasks. Using such a system in your veterinary management provides a veterinarian with the opportunity to create a cutting-edge advantage for patients, owners and employees.

## **Result**

Thus, the project team formed, the project is described, the business case was prepared and the problem statement was arrived.

**DEPT. Of NWC**

**SRM IST, Kattankulathur – 603 203**

**Course Code: 18CSC206J**

**Course Name: Software Engineering and Project Management**

<b>Experiment No</b>	2
<b>Title of Experiment</b>	<i>Identification of Project Methodology and Stakeholder Description template</i>
<b>Name of the candidate</b>	Vanshaj Barnwal
<b>Team Members</b>	Anushk Shubham
<b>Register Number</b>	RA2011032010035 RA2011032010056
<b>Date of Experiment</b>	9/04/2022

### Mark Split Up

S.No	Description	Maximum Mark	Mark Obtained
1	Exercise	5	
2	Viva	5	
Total		10	

**Staff Signature with date**

#### **Aim**

To identify the appropriate Process Model for the project and prepare Stakeholder and User Description.

#### **Team Members:**

SI No	Register No	Name	Role
1	RA2011032010035	Vanshaj Barnwal	Member
2	RA2011032010056	Anushk Shubham	Member

**Project Title: OVAS**

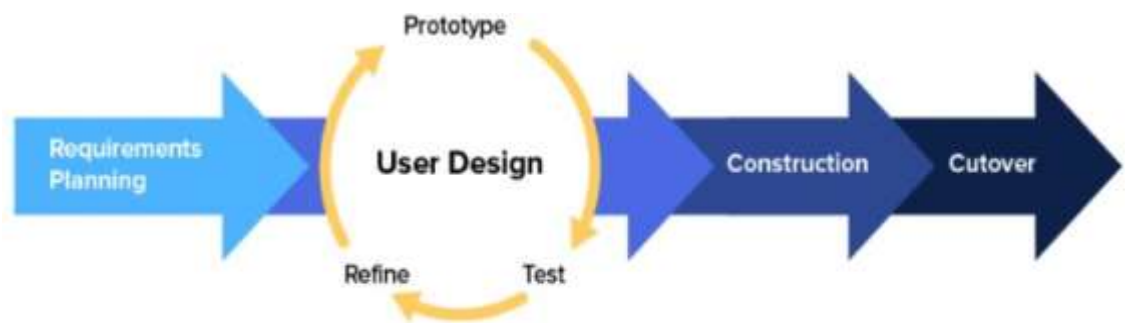

### Team Members:

SI No	Register No	Name	Role
1	RA2011032010056	Anushk Shubham	Project Manager, Company Owner, Creatives and Marketing head, Team member, Resource Manager
2	RA2011032010035	VANSHAJ BARNWAL	Project Manager, Company Owner, Creatives and Marketing head, Team member, Resource Manager
3		Nallarasana V	Mentor

### Selection of Methodology

#### Rapid application development (RAD):

**Rapid Application Development (RAD)** is a form of agile software development methodology that prioritizes rapid prototype releases and iterations. Unlike the Waterfall method, RAD emphasizes the use of software and user feedback over strict planning and requirements recording.

Incorporate ***Identification of Project Methodology and Stakeholder Description template***

Stakeholder Name	Activity / Area / Phase	Interest	Influence	Priority
Creatives & marketing head	Promote the product	High	Medium	5
Project Manager	Manage the entire team and project	Medium	High	10
Frontend Developer	Work on developing the website	Medium	Medium	12
Company Owner	Inspire employees	High	High	3
Team Member	Development	Medium	Low	11
Executive Director	Manage executing the project	Low	Medium	8
Maintainer	Maintain the hosted website	Low	Low	4
Tester	Manage automated testing for code	Low	Low	6
Senior Management	Manage staff	Low	High	8
Strategic Management	Manage the project direction over revisions	High	High	7
Resource Manager	Allocate and allot resources to members	Low	Low	9
Mentor	Supervise and guide members to complete the project successfully	High	High	2
User	Use the application with ease	High	High	1

Result

Thus the Project Methodology was identified stakeholders were described.

1	Exercise	5	
2	Viva	5	
<b>Total</b>		<b>10</b>	

**Staff Signature with date**

## Aim

To identify the system, functional and non-functional requirements for the project.

## Team Members:

S No	Register No	Name	Role
1	RA2011032010035	Vanshaj Barnwal	Member
2	RA2011032010056	Anushk Shubham	Member

## Project Title: OVAS

## System Requirements

System Requirements: At least 3 systems with any of the following configurations

	Windows requirements	Mac requirements	Linux requirements
Operating system	Windows 8 or later	macOS Sierra 10.12 or later	64-bit Ubuntu 14.04+, Debian 8+, openSUSE 13.3+, or Fedora Linux 24+
Processor	Intel Pentium 4 or later	Intel	Intel Pentium 4 or later
Memory	2 GB minimum, 4 GB recommended		
Screen resolution	1280x1024 or larger		
Application window size	1024x680 or larger		
Internet connection	Required		

## Functional Requirements

- Adding customer: the veterinary clinic system enables the staff to include new customers to the system.

- Record customer's basic data.
- Registration of pet details. search for a pet.
- Book a time for an appointment.
- View visit details.
- Remove medication or procedure from the application.
- Add medication or a procedure to application.
- update medication or procedure from the application.
- track the detailed information of pet, booking, appointment, medicine. doctors can view their patients' treatment records and details easily.

### **Non-Functional Requirements**

- Flexibility: The system is convenient and flexible to be used.
- Availability: The system is available all the time.
- Usability: the system is easy to use by Staff.
- Maintainability: the system is easy to modify and maintain

### **Result**

Thus the requirements were identified and accordingly described.

## 1. Project Management Plan

Describe the key issues driving the project. [Min 3 Focus Areas]

Focus Area	Details
Integration Management	All project decisions must be made after weighing all of the benefits and drawbacks, and in the event of a disagreement, a vote must be conducted and the outcome must stand.  Team roles and responsibilities: Project Manager Front end developer Back end developer
Communication Management	All vital details and information should be provided to the team's official group, along with a label indicating the message's urgency. All deadlines will be communicated and informed well in advance. The team will work with the customer for two months to oversee any bugs and provide assistance as needed
Stakeholder	Project manager, Front end developer, Back end developer Business analyst, Cost estimation, Tester

## 2. Estimation

### 2.1. Effort and Cost Estimation

Activity Description	Sub-Task	Sub-Task Description	Effort (in hours)	Cost in INR
----------------------	----------	----------------------	-------------------	-------------

Design the user screen	E1R1A1T1 (Effort-Requirement-Activity-Task)	Developing front end of the website	30	15000
	E1R1A1T2	Developing back end of the website	30	15000
	E1R1A1T3	Database	10	5000
Identify Data Source for displaying units of Energy Consumption	E1R1A1T4	Document	8	4000

Effort (hr)	Cost (INR)
1	500

## 2.2. Infrastructure/Resource Cost [CapEx]

< OneTime Infra requirements >

Infrastructure Requirement	Qty	Cost per qty	Cost per item
Hosting server	1	4000/month	4000
Hardware	3	50000	1.5lakh

## 2.3 Maintenance and Support Cost [OpEx]

Category	Details	Qty	Cost per qty per annum	Cost per item
People	Network, System, Middleware and DB admin  Developer , Support Consultant	3	2,000,000	6,000,000
License	Operating System Database Middleware IDE	10	10000	100,000
Infrastructures	Server, Storage and Network	20	20000	400,000

## 3. Project Team Formation

### 3.1. Identification Team members

Name	Role	Responsibilities
Vanshaj	Key Business User	Provide clear business and user requirements
Vanshaj	Project Manager	Manage the project
Anushk	Business Analyst	Discuss and Document Requirements

Vanshaj	Technical Lead	Design the end-to-end architecture
Anushk	UX Designer	Design the user experience
Vanshaj	Frontend Developer	Develop user interface
Shruti	Backend Developer	Design, Develop and Unit Test Services/API/DB
Shruti	Cloud Operations	Provision required Services
Shruti	Tester	Define Test Cases and Perform Testing

### 3.2. Responsibility Assignment Matrix

RACI Matrix	Team Members			
Activity	Name (BA)	Name (Developer)	Name (Project Manager)	Key Business User
User Requirement Documentation	A Vanshaj Anushk	C/I	I	R
Front end Development	R	A	C	I
Backend Development	R	A	C	I
Testing	R	C	A	I
Database Management	I	C	R	C

A	Accountable
R	Responsible
C	Consult
I	Inform

Result:

Thus, the Project Plan was documented successfully.

    - 4.2.4 Catalog Engine
    - 4.2.5 Transaction Processing
  - 4.3 Graphics and Interface
  - 4.4 Content Creation
- 5.0 Testing and Production

## TIMELINE – GANTT CHART

## RISK ANALYSIS – SWOT & RM

	Positive	Negative
Internal	<p><i>Strengths</i></p> <ul style="list-style-type: none"> <li>- Disintermediation and automation</li> <li>- Immutability</li> <li>- Trust</li> <li>- Transparency</li> <li>- Privacy</li> </ul>	<p><i>Weaknesses</i></p> <ul style="list-style-type: none"> <li>- Operation costs</li> <li>- Creation of possible forks</li> <li>- Lack of flexibility</li> <li>- Need of greater capability of data storage on local servers</li> </ul>
External	<p><i>Opportunities</i></p> <ul style="list-style-type: none"> <li>- Greater collaboration among the operators of the healthcare system</li> <li>- Increase of the technological awareness and development of new expertise</li> </ul>	<p><i>Threats</i></p> <ul style="list-style-type: none"> <li>- Resistance to change</li> <li>- Lack of expertise</li> <li>- Lack of trust in the application of a new technology by healthcare workers</li> </ul>

## Risk Management Framework

RESPONSE	STRATEGY	EXAMPLES
<b>AVOID</b>	Risk avoidance is a strategy where the project team takes action to remove the threat of the risk or project from the impact	-Scope of work is poorly specified. -Running the site could become challenging. -Scope creep. -Latest curriculum
<b>TRANSFER</b>	Risk transference involves shifting or transferring the risk occurring. This does not risk or potential impact, but rather reduces the likelihood of it becoming real.	-Time to Learn -Selecting the material -Unmet expectation -Lacking resource
<b>MIGRATE</b>	Risk migration is a strategy where by the project team takes an action to reduce the probability of the risk occurring. This does not risk or potential impact, but rather the likelihood of it becoming real.	-Unstable workload. -Lack of developers -Working on feedbacks
<b>ACCEPT</b>	Risk acceptance means the team acknowledges the risk and its potential impact, but decides not to take any preemptive action to prevent it. It is dealt with only if it occurs.	-Updating material -Improving design -Making interface as easy as a user need.

Result:

Thus, the work breakdown structure with timeline chart and risk table were formulated successfully.

## Test Case

### Functional Test Cases

Test ID (#)	Test Scenario	Test Case	Execution Steps	Expected Outcome	Actual Outcome	Status	Remarks
1	Verify Successful Login	Login with registered username and password	1. Click on the Login/Signup option in the homepage 2. User enters their username and password 3. Click on Login button.	User will be able to see their profile	User will be redirected to the home page upon successful login.	Pass	Success
2	Manage Appointment	User select "Make Appointment" to book an appointment	1. Click on add Appointment. 2. User insert their appointment details	User will be able to see appointment details.	System displayed appointment details.	Pass	Success
3	Add Disease	User select "Add Disease" to add new disease	User insert the disease details by choose the animal type and tick their symptom for new the disease	User select "Display List Disease" to view list disease and then the list appears.	System displayed the list of disease	Pass	Success

4	Treatment Report	Admin select "Treatment Report"	Admin need to choose animal type in a dropdown menu.	System should show the treatment report	The system shows all the treatment details based on animal type	Pass	Success

## Non-Functional Test Cases

Test ID (#)	Test Scenario	Test Case	Execution Steps	Expected Outcome	Actual Outcome	Status	Remarks
1	Capacity	Signing up for a new account	1.Login 2.Access to Home Page	Access to website features	Access to personalized transaction log	Pass	Success
2	Security	Unauthorized Access	1.Accessing user account using account link without login privileges	Should redirect to login page	Redirect to login page	Pass	Success
3	Reliability	Access to data 24x7	1.Login with user account in separate intervals	Successful Login	Successful Login	Pass	Success
4	Accuracy	Accurate transaction details	1.Login 2.Monitor the transaction log and pie charts for every individual transaction	Proper tracking of transactions	Accurate monitoring of transaction	Pass	Success

Result:

Thus, the test case manual has been created for the OVAS
